

Jade Yang

U.S. Citizen | (541) 941-5341 | jadeyang1314@gmail.com | www.linkedin.com/in/jadeyang27

EDUCATION

B.S. in Applied Computing – Cybersecurity

August 2023 – May 2026

Arizona State University | GPA: 3.8, Dean's List, Summa Cum Laude

EXPERIENCE

Data Analyst

January 2026 – Present

Southwest Mission Acceleration Center

Phoenix, AZ

- Engineered automated Python and API-driven data pipelines to ingest and process large-scale structured and unstructured datasets for intelligence workflows, reducing manual processing time by 40%
- Researched emerging defense technologies and companies to support government funding analysis and technology assessment efforts

FBI Honors Intern – TS/SCI Clearance

June 2025 – February 2026

Federal Bureau of Investigation (FBI)

San Francisco, CA | Phoenix, AZ

- Led and supported 5+ counterintelligence outreach briefings for 30+ elected officials and senior staff across the Bay Area, communicating foreign influence and insider threat risks to non-technical stakeholders
- Analyzed OSINT data to produce written assessments supporting threat identification, risk prioritization, and operational decision-making

PROJECTS

Linux Security Homelab

May 2026

- Built a layered Linux defense environment simulating enterprise security operations by hardening SSH, UFW, Fail2Ban, and Auditd across 6 critical system paths, validating full detection-to-ban response in <30 seconds against a live Hydra brute-force simulation across 100+ credential permutations
- Deployed WireGuard VPN, NGINX reverse proxy, and Wazuh SIEM to establish encrypted network segmentation and centralized log correlation across 3+ services, enabling real-time threat visibility through custom Grafana dashboards

CTA Intelligence Classification Pipeline

April 2026

- Engineered an automated Python pipeline to classify 1,700+ defense company records against DoD Critical Technology Areas (CTAs) by integrating web scraping (BeautifulSoup), Salesforce lead data, and a locally hosted LLM (Ollama) with structured JSON output (Pydantic validation), achieving confidence scoring ≥ 0.90 and flagging low-confidence results for analyst review

LEADERSHIP

CTF Captain – Aerospace Cybersecurity

April 2026

Capture-the-Flag Competition | 3rd Place / 26 Teams / 100+ Competitors

- Led offensive and defense operations in a simulated airport-wide cyber incident; conducted penetration testing and vulnerability exploitation using Nmap, Wireshark, and Burp Suite
- Performed network enumeration, privilege escalation, and reverse engineering of encrypted malware sample in a controlled, realistic adversarial environment

President, Club Tennis

May 2025 – April 2026

Arizona State University

- Managed a 55+ member collegiate organization and oversaw a \$35K+ annual budget; serving as primary liaison with university administration and external partners

TECHNICAL SKILLS

Security Operations & Analysis: Threat Analysis, OSINT, Penetration Testing, Vulnerability Assessment, Incident Response, Malware Analysis, Network Enumeration, Privilege Escalation, Log Analysis, Firewall Management

Tools & Platforms: Tools & Platforms: Wireshark, Nmap, Burp Suite, Kali Linux, Ubuntu/Linux, FTK Imager, WireGuard, NGINX, Wazuh, Grafana, Fail2Ban, Auditd, UFW, Ollama, Pydantic

Programming: Python (API integration, data pipelines, web scraping, log parsing), Java, C, HTML

Languages: Mandarin (Fluent)
